

# COMPUTE

Integrate your IT environments to deliver a high-performance application experience with Tata Communications Vayu Cloud Compute.

Take control of your Virtual Machines and setup on specialised SSDs with centralised management.

## Overview

Tata Communications Vayu Cloud Compute provide choice of customary, CPU-augmented, or memory-optimised structures to scale up your app experience. Compute offers pre-defined templates for Ubuntu, Windows, Red Hat, SUSE CentOS etc. With a state-of-the-art portal, you can provision your own resources on click of a button with pay as you go model. Our customers can take advantage of our auto-scaling feature, which creates instances when the load policy reaches a certain maximum as set by the user. As soon as the load is reduced, the instances are automatically deleted.

## Why Tata Communications Vayu Cloud Compute...?

### Customisable environment

Option to customise **RAM, CPU, SSDs** and create snapshot of your cloud server in a few clicks
