

Strengthening cyber-resilience:

Essential building blocks for modern organisations

THE NEED

Cyber risks:

Cyber threats and regulatory non-compliance ranked as the **#1 business risk** in 2024.

Disruptions are common:

87% of organisations faced disruptions lasting days to weeks.

Maturity gap:

Only **13%** report disruptions under a day, **40%** are in early stages of resilience planning.

WHY CYBER-RESILIENCE MATTERS:

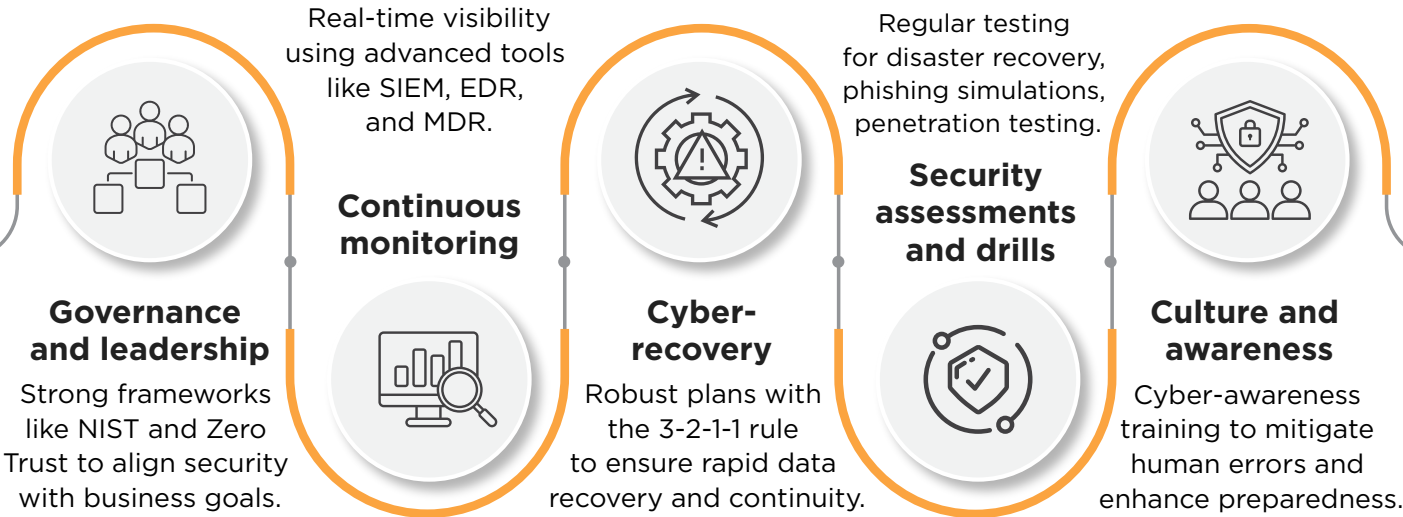

Ensures critical systems remain operational during attacks (Ransomware, DDoS, etc.).

Strategic enabler for business continuity and a key differentiator in digital transformation.

FOUNDATION FOR OPERATIONALISING CYBER-RESILIENCE:

BUSINESS OUTCOMES

Reduced downtime and operational risks

Quicker recovery and claims processing

Lower risk of compliance fines

TATA COMMUNICATIONS' APPROACH

Tata Communications leverages its **Anticipate-Defend-Respond (ADR)** framework to deliver holistic cybersecurity solutions that strengthen resilience, ensure proactive defense, and enable swift recovery.

- Comprehensive offerings across **Advisory, Transform, and Manage**.
- Solutions like **Advanced threat detection, DDoS protection, Managed SOC, Cloud security and Security assessment and consulting**.
- Proactive assessments: Vulnerability testing, phishing simulations, and cyber maturity checks.
- Faster threat response and recovery for business continuity.

PARTNER WITH TATA COMMUNICATIONS TO BUILD YOUR CYBER-RESILIENCE STRATEGY
